### **PAPER**

Sir:

Submitted herewith is the Notification of Transmittal of Copies of Translation of the International Preliminary Report on Patentability dated March 30, 2006.

Respectfully submitted,

Soar M. McGinn Registration No.: 34,386

NOTIFICATION OF TRANSMITTAL
OF COPIES OF TRANSLATION
OF THE INTERNATIONAL PRELIMINARY REPORT
ON PATENTABILITY
(CHAPTER I OR CHAPTER II
OF THE PATENT COOPERATION TREATY)

(PCT Rules 44bis.3(c) and 72.2)

MIYAZAKI, Teruo
8th Floor, 16th Kowa Bldg.
9-20, Akasaka 1 Chome
Minato-ku, Tokyo 1070052
JAPON

APR - 6, 2006

IMPORTANT NOTIFICATION

Date of mailing (day/month/year) 30 March 2006 (30.03.2006)

Applicant's or agent's file reference NEC04P012

International application No. PCT/JP2004/005997

International filing date (day/month/year) 26 April 2004 (26.04.2004)

Applicant

NEC CORPORATION et al

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter I).

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

EP, KR

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

via a silicon-containing insulating film, therefore it

International application No.
PCT/JP2004/005997

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

would be easy for a person skilled in the art to apply the gate insulating film disclosed in document 3 as the gate insulating film in the invention set forth in document 1 (entire text; all drawings) and document 2 (paragraphs [0036] to [0058], [0080]; fig. 1, 2 and 6).

In addition, documents 4 to 6 set forth a feature wherein a sidewall comprising a silicon oxide film is formed via an insulating film comprising a silicon oxide film in order to prevent the occurrence of stress, and to prevent the occurrence of boundary levels by ensuring that a sidewall comprising a silicon nitride film does not come into direct contact with a semiconductor substrate. It would therefore be easy for a person skilled in the art to employ the feature of forming a silicon oxide film set forth in documents 4 to 6 before forming the silicon nitride film of the inventions set forth in documents 1 and 2.

Moreover, it was a known technique at the time of filing of this application to form an insulating film comprising a silicon nitride film on a metal oxide film with a high dielectric constant in order to prevent reactions between the metal oxide film with a high dielectric constant and the gate electrode.
